AVIATION

Grades 1-5

Hobby Quest's "Flight – The Next Generation!"

Time to turn up your imagination and look into the future with Hobby Quest's "Flight – The Next Generation"! All of the planes we are building in this class will be inspired by what aircraft of the future might be like! We'll get started by building our **Starfighter**, a special rubber band powered helicopter inspired by the TIE fighter ships from Star Wars! You'll really be able to open up your mind and dream up a cool flying machine from space! Next we'll fly the **Air Victor**, our very first ever **remote control** helicopter! The **Spitfire** is a super cool advanced plane that will help take our imagination to new heights! Those amazing models are just the beginning! In addition to building and flying cool model airplanes, we'll also learn about the history of flight, and what the future might hold! Don't miss out on the chance to become a flight expert for The Next Generation!

Built it! Fly it! Keep it!

INTRO TO KEYBOARD AND GUITAR

Grades K-2

Learn to Play Music!

MusicStart provides a fun, appropriate, initial exposure to playing and understanding music. This class will blend: What many kids need- playing the MusicStart keyboard, and what many kids want- playing the guitar. All foundations of musical concepts are covered, making this class a great preparation for, or supplement to, playing any musical instrument. MusicStart and the special MusicStart Keyboard were designed as an improvement over using the traditional recorder to start kids playing, and teach step-by-step problem solving. Instruments are provided. Demo video and more information at beginmusic.com

GLOBAL DOCTORS ANATOMY

Grades 3-5

The road to becoming a doctor is long, uphill and winding - so how about a shortcut?

By taking this course you'll get to explore the intricacies of human body systems through individual specimen dissections! Exploring the insides of animals is a great way to learn about our own organs and how organ systems work together. During each class, you will be guided in the dissection of a new specimen - this includes a frog, grasshopper, earthworm, snake, shark and more. As "global doctors in training" you will get to wield your own scalpel and even learn how to grow bacteria!

Like all Level Up Village courses, you will be partnered with a Global Partner Student in a developing country. Together, by exchanging video messages each lesson, you'll learn about each other's country and culture through the lens of global health while also sharing observations about your hands-on animal specimen dissections. By the end of this course you'll be handy with a scalpel, more knowledgeable about the human body, and connected to a new friend on the other side of the world!
