

Maintenance Work Requires Power Outage

As a part of ongoing maintenance on the transmission line serving the area north of Hailey, Idaho Power crews will be replacing damaged power poles in the Ketchum area on Oct. 13. These upgrades will require a power outage from 11 p.m. to 7 a.m. to ensure crews can safely complete the work.

Affected customers will receive an automated call in advance of the outage at the phone number Idaho Power has on file.

We apologize for the inconvenience and appreciate your understanding.
