

Amanda Shellenberger

Amanda Shellenberger is a Senior Managing Engineer and Senior Associate at Anchor QEA in Seattle. She has fourteen years of experience in environmental engineering, focusing on the source control and remediation of large contaminated sediment sites, such as the Portland Harbor Superfund Site in Oregon and the Newtown Creek Superfund Site in New York. Amanda specializes in presentation development, multi-party coordination and facilitation, and communication of technical information to non-technical audiences.

Amanda received her B.S and M.S.E in Civil Engineering from Loyola Marymount University and is a licensed civil engineer in Washington, Oregon and California. She has been involved in ASCE at the local and national level and currently serves as the Seattle Section Branch Director and on the National Engineers Week/ DiscoverE Task Committee.
