

# Bellevue, WI - Bellevue Commons

## New Construction

### Project Summary:

This project was completed in Bellevue, WI in the Spring of 2016. Fullerton's scope included the exterior wall panels, Ijoist Roof System, Boral Profit LedgeStone in Southwest Blend, Nichiha Lap Siding - Vintage Wood in Cedar Finish, metal wall panels, along with our non-union installation crew. The GC provided the steel for this project and had it set before FBS arrived with the panels. FBS building measurements were critical so that the panels and steel matched up correctly once the panels were set into place. Total Construction time was 14 business days.

### Meet or Exceeding Owners Goals, Values and/or Expectations:

Jimmy Rosen of Bellevue Commons, LLC has used the FBS System on several of his projects. He likes the expedited construction schedule that the FBS building package gives him. He also is accustomed to the high quality package that Fullerton provides and he doesn't get any surprises on building materials. The FBS package arrives on-site with the exterior finishes applied on the panels and the certified FBS assembly crew installs the building package according to the FBS plans and specifications.

### Client Profile:

Bellevue Commons, LLC (Jimmy Rosen) is a developer and works out of his offices in Wisconsin and Colorado. Working with Jimmy has always been a pleasant experience and his entire organization is easy to work with. We enjoy our partnership with him and his company.
