

Innovation Topics

Computing

360 Cameras
Face / Iris Authentication
Spectral Imaging
3D Imaging
Haptics
Flexible Displays
Advanced Bio / Health Sensors
Virtual & Augmented Reality Computing
Head Mounted Displays
Quick / Wireless Charging Devices
Battery Technology

Energy/Environmental

Energy storage, clean coal technology
Renewable energy resource development - wind, solar, biomass
Sustainable products manufacturing

Information Technology

Algorithm development and analysis of Smart Meter and operations data
Banking technologies
Cloud-based banking services
Cognitive computing application development
Cyber security/data protection
Data Analytics
Data mining software
Digital banking
Digital invoicing methodology
Digital media and entertainment technology
Digital workplace development
eCommerce for Retail
Efficient tax payment processes
Energy efficiency in construction
Facial recognition/Biometric Scanning technologies
Low cost sensor networks for decision making and process optimization
Machine to Machine (m2m) Internet of Things
Mesh Network technology
Mobile Application development
Online asset management applications
Procurement system development
Retail Digitization
Software or applications based technology for which the WBE is the owner/developer and or exclusive reseller
Telematics tracking

Manufacturing

3D printing
Advanced materials manufacturing

Advanced robotics, sensors, vision systems
Concrete floor painting technology
Energy efficiency for manufacturing facilities
Janitorial & Cleaning equipment process efficiency
Office supply product innovation

Supply Chain

Retail Supply Chain Optimization
Supply Chain Modernization
Supply Chain Process Improvement
Transportation & Logistics Services
