GERMANY - Germany has long been a region of fascination, though the country itself is a fairly recent creation in Europe. From the noble heights of the Holy Roman Empire to the lows of WWII and the Nazi regime, the industrious people of Germany have emerged stronger than ever. Students will begin in Amsterdam, with a visit to Anne Frank's house, then off to see the Holocaust Memorial in Berlin, and finally enjoy Bavaria, the capital city of Munich.

PERU - is a multi-ethnic country, a melting pot that has created a variety of expressions in art, literature, and music. It was home to two of the great ancient civilizations, and while it now boasts the modern urban centers of Lima and Cusco, in many of the small villages the old ways have been preserved and are respected throughout the country. A trip to Peru is more than a visit; for many, the experience is life-changing.
