

EURO Quick-Connect Nozzle, Filler Valve, & Adapters

EURO Quick-Connect Nozzle

The most advanced system is the EURO 'push-on' connection to European Standards. Compared to ACME couplings, EURO connectors incorporate a variety of advantages, such as easy one-handed operation, enhanced safety features and very low gas release upon uncoupling. The construction of ZVG 2 EURO UL prevents a discharge of LPG to the atmosphere when the nozzle is not correctly coupled. When uncoupling, the captured pressure is released before the nozzle separates from the fill point to inhibit blowbacks. UL Listed

ZVG2-T

Autogas Filler Valve

Remote filler valve assembly allows filling through the EN 12806 Euro connection. Kit includes Black Housing, Cap and Euro Filler Valve. 1/2" M Flare connection. UL Listed

68.0065

Euro/ACME Adapters

Converts the EN 12806 connection to ACME connection. Once installed the adapter will prevent any disconnection caused by accidental rotations of the filling head. Incorporates Female Euro & Male ACME connection.

16.0320

SNAP-FILL Low Emission Filler Valve

The SNAP-FILL is a 3/4" M NPT Forklift / Lawn Mower Cylinders Filler Valve. SNAP-FILL's direct connect feature eliminates propane bypass caused by worn or improperly threaded connections and eliminates propane fuel line discharge. Ergonomic features such as one-handed operation provide enhanced ease and speed of connection to minimize filler fatigue while increasing productivity. SNAP-FILL also dramatically reduces emissions and is compatible with new automated carousel-style filling systems. It is UL Listed.

66.1327

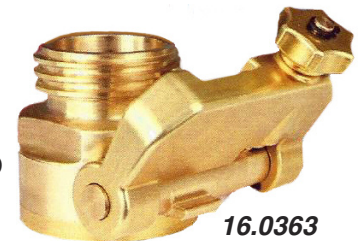

16.0331

Converts the ACME connection to EN 12806 connection. Incorporates Female ACME & Male Euro connection.

ACME/EURO Adapter

16.0363 adapter allows a fill nozzle (bobtail/dispenser) with ACME threads to attach to this adapter and fill consecutive cylinders that incorporate EURO connections such as the Snap-Fill low emission filler valve.
