

Rush University Medical Center, located in downtown Chicago, is seeking an experience BC/BE Hematology/Oncology clinician to serve as Division Chief of Hematology, Oncology & Cell Therapy. The Rush University Cancer Center (RUCC) programs are fully accredited by the Commission on Cancer of the American College of Surgeons and recently received the best-in-class distinction of gold commendation.

We are seeking a clinician who is committed to providing quality patient care and patient satisfaction, and possesses familiarity and experience with accreditation procedures in cellular therapies. In addition, the successful candidate will demonstrate research achievement as a physician scientist, commitment to education, and creative leadership with a strong record of collaboration and commitment to academic excellence. As a Division leader, the Chief will provide an energetic and inventive vision for maintaining and growing a departmental clinical and educational program, develop strategic interdisciplinary research teams for furthering research and coordinate care at various affiliate/satellite sites.

Rush Medical College was established in 1837 and is one of the oldest medical colleges in the United States. Rush University Medical Center (RUMC) is one of the largest private academic medical centers in Illinois. Rush is a thriving center for basic and clinical research, boasting state-of-the-art facilities with over 1,600 on-going research projects.

We encourage women and minorities to apply.

**Jochen Reiser, MD, PhD; Chairman, Department of Internal Medicine
