

**Head, Division of Nephrology & Hypertension
Department of Medicine
Oregon Health & Science University**

The Department of Medicine at Oregon Health & Science University seeks applications for the role of Head, Division of Nephrology & Hypertension. The division head has overall responsibility for providing strategic direction and effective leadership to the division, while advancing the clinical, educational, and research missions of the School of Medicine. The division head will be expected to grow and develop the division's research enterprise, with a specific focus on physician-scientists, in addition to sustaining and growing the existing comprehensive clinical and educational programs. The division head will also work closely with the Chair and the clinical enterprise to develop and implement innovative models of high value clinical care, in accordance with our mission to improve the health of the population of the state of Oregon.

The Division of Nephrology & Hypertension provides all aspects of comprehensive, full-service nephrologic clinical service to the OHSU Hospital as well as the closely affiliated VA Portland Healthcare System. Services include nephrology consultation, hypertension consultation, all forms of inpatient and outpatient renal replacement therapy, as well as active transplant services at both OHSU and the VA. We provide outreach expertise to providers throughout the region, as well as inpatient consultative services to complex patients on inpatient wards and intensive care units. Our educational program includes a highly successful nephrology fellowship, a fellowship in transplant nephrology, and an active NIH T32 training grant.

As the only academic medical center in Oregon, OHSU is a leader in tertiary and quaternary clinical care, with over 30,000 admissions per year, and many specialized care centers including the Knight Cancer Institute and the Knight Cardiovascular Institute. OHSU grants doctoral degrees in medicine, nursing and dentistry, and hosts over 1100 residents and fellows each year. More than 1100 principal investigators brought in \$ 355M in research grants last year, and OHSU ranks consistently in the top 25 for NIH funding. A large number of research institutes and core research facilities are available for collaboration and services. OHSU is physically linked via skybridge with the Portland VA, which also features vibrant educational and research programs, and is the academic home to many departmental faculty.

The successful candidate will be an accomplished academic physician-scientist with substantial experience in research, clinical care, education, and administrative leadership. We are specifically seeking an individual with a demonstrated ability to maintain an externally funded research program, and the ability to nurture younger physician-scientists. We are particularly interested in applications

from individuals experienced in interdisciplinary translational research. Candidates must possess an MD degree or equivalent and active board certification in nephrology, and be eligible to obtain clinical privileges and an unrestricted license to practice in Oregon. Academic appointment will be commensurate with experience, at the Associate Professor or Professor level.

Interested candidates should submit a cover letter describing interest and qualifications, curriculum vitae, and names and contact information (email and telephone numbers) of three references by email to Nancy Clark (clarkn@ohsu.edu).

OHSU provides equal opportunities to all individuals without regard to race, religion, national origin, disability, age, marital status, sex, sexual orientation, gender identity or expression, military service, or any other status protected by law. This policy applies to all employment, education and patient care related activities. Applicants with disabilities can request reasonable accommodation by contacting the Affirmative Action and Equal Opportunity department at 503-494-5148.
