

Associate Vice President, Health Systems Planning & Analytics, The University of Texas Southwestern Medical Center, Dallas, TX

The University of Texas Southwestern Medical Center (UT Southwestern) seeks an accomplished strategic planning executive to lead the planning, coordination, and evaluation of new programs and services. This position, the Associate Vice President (AVP) of Health Systems Planning and Analytics, is a highly visible, integral role within the organization, focused on the evaluation of new and current programs and services at UT Southwestern.

The AVP plans, directs, and coordinates all areas associated with the integration of services across UT Southwestern and with affiliated institutions. The AVP will work closely with leaders at the School of Medicine and Health System to identify and assess strategic opportunities, program and service development, new ventures, physician acquisition and overall performance. The AVP directs and oversees business analytics, management reporting, and system performance management to facilitate and support strategy development for the Health System.

The successful candidate will demonstrate a track record of success in strategic planning and business development within an academic health system. The ability to develop and lead teams, analyze complex situations, manage diverse constituencies, build strong relations, project manage and provide strategic thought leadership are essential. A Master's degree in finance, business or healthcare administration is required. Progressive experience in the development of pro formas, forecasting, financial modeling, due diligence, metrics, benchmarking systems, Six Sigma, lean processes and other methodologies for obtaining accurate operational and financial information are required.

The University of Texas Southwestern Medical Center integrates pioneering biomedical research with exceptional clinical care and education. The institution's faculty includes many distinguished members, including six who have been awarded Nobel Prizes since 1985. Numbering approximately 2,800, the faculty is responsible for groundbreaking medical advances and is committed to translating science-driven research quickly to new clinical treatments. UT Southwestern physicians provide medical care in 40 specialties to more than 90,000 hospitalized patients and more than 1 million ambulatory patients each year.
