

Chair, Department of Neurology, Boston University School of Medicine, Chief of Neurology at Boston Medical Center

A national leader is sought for the position of Chair, Department of Neurology, BU School of Medicine and Boston Medical Center. The Department has a very strong tradition of clinical care, research and education at Boston Medical Center, VA Healthcare Systems in Boston and Bedford.

The Department has nationally known research programs in Alzheimer's disease, Chronic Traumatic Encephalopathy, Stroke, Neurogenetics and Molecular Neuropharmacology. There is extensive research involvement in the Framingham Study, Bedford VA Medical Center. The Department is also a leader in the provision of clinical care in the area of Acute Pain, Dementia, Epilepsy, Movement Disorders and Stroke.

The Chair oversees each of the core missions of the Neurology Department at BUSM and BMC. The successful candidate will be expected to oversee the neurology clinical programs in neuro-critical care, the neurology inpatient and consultation service and a number of ambulatory clinics and interdisciplinary programs. The Neurology research and training programs of BUSM and BMC, and affiliates, will also be important responsibilities of the Chair as will maintaining the strong educational programs at the Boston University School of Medicine.

The Chair will be expected to have outstanding leadership and management skills and to merit appointment at the rank of Professor in the BU School of Medicine. The extraordinarily diverse patient population at Boston Medical Center presents a special obligation and opportunity to create programs that respond to the needs of culturally diverse and underserved urban patient populations. BU and BMC greatly value recruiting women and minorities to leadership positions. Interested candidates should submit their CV and a letter of interest to Melissa Kelly at mae@bu.edu. Boston University and Boston Medical Center are equal opportunity employers.
