

The Center for Global Security Research (CGSR) at Lawrence Livermore National Laboratory in Livermore, California is seeking to recruit qualified individuals from a broad array of disciplines to contribute to its analytical and outreach activities. Multiple fellowships are available, including for individuals who are not citizens of the United States, with varying terms and conditions.

CGSR's primary role is to catalyze broader national and international thinking about the requirements of effective deterrence, assurance, and strategic stability in a changed and changing security environment. It also seeks to identify whether and how technically-based solutions can address new challenges to national and

international security. It is an intellectual bridge among the science, technology, and policy communities.

The Center's analytical agenda is loosely organized around five main thrust areas: (1) Russia, European Security, and Deterrence; (2) China, Northeast Asian Security, and Deterrence; (3) New Regional Challengers and Challenges; (4) The New Dynamics of Long Term Competition; and (5) The Future of Cooperative Measures to Reduce Nuclear Dangers. More details can be found at <https://cgsr.llnl.gov>.

To support this agenda, CGSR is seeking students from all university levels: post-doc, pre-doc, and undergraduate. As a general principle, research fellows will collaborate on joint research projects with leading laboratory experts while also conducting independent work. Appointments are available for a minimum of a semester and a maximum of four years. Each fellowship provides a competitive salary with a budget to cover program activities, including travel. The Center is actively seeking to diversify participation by recruiting both inside the science and technology community and more broadly, including specifically individuals in the fields of security study and political science more broadly. Check out the links below.

Livermore Graduate Scholar Program	PhD candidates	https://lgsp.llnl.gov	Apply by April 1, 2016
Lawrence Fellow Program	Postdoc - within 5 years of graduation	https://fellowship.llnl.gov	Apply by Nov. 1, 2015
LLNL Postdoctoral Position	Graduate - within 5 years of graduation Apply for specific positions	https://postdocs.llnl.gov	Year-round
LLNL Student Internship Program	Undergraduate, graduate or accepted into a program	https://scholars.llnl.gov/	Year-round
Internship Postings	Undergraduate and graduate	https://careers.llnl.gov	Specific Job postings - Contact CGSR
DOE Scholar Programs	Students or recent college graduate	http://orise.orau.gov/doescholars	Applications accepted Sept. 15 - Dec 15, 2015

U.S. citizenship not required, except in certain positions.

Please contact Dr. Mona Dreicer at (925) 422-7588 with any questions.
