**Jim Jubelirer's "First Fridays: Grit and Growth" (Apr. 10)**

This month's webinar is part of the First Fridays Leadership Series. Grit is having both the passion and the perseverance to achieve a goal. Grit has repeatedly been shown to be a better predictor of success than intelligence, connections, willpower or self-control. The best way to develop/reinforce grit is by cultivating a growth mindset. People with growth mindsets feel that ability can be developed -- they try new challenges and learn from setbacks. This webinar will dive into the science and practice of developing grit and a growth mindset. You will also get access to online assessments to calculate your own strengths and weaknesses in these key areas. Free online webinar, 12:00 - 12:30 p.m. Friday, April. 10. Register at <http://conta.cc/1GUqUNC> .
