Hidden Environmental Hazards and Compliance Basics

2110 N. Fancher Rd., Room 109 | Spokane Valley, WA

In Partnership With:

Please join us for three *FREE* technical workshops designed for construction industry professionals!

Asbestos Awareness: What You Need to Know Before Starting Your Project

Session 1: 8:00 am-10:00 am

Asbestos is a natural mineral widely used in building construction materials and products. Left undisturbed and in good condition, these products can perform as intended. Problems arise when they deteriorate, fall apart, or are disturbed during demolition and renovation work. If you are a homeowner, landlord, contractor, property manager, etc., involved directly or indirectly in altering a structure in any way, your project is subject to asbestos regulations, no matter the age of the building.

- ▶ Discover Health Effects Associated with Asbestos Exposure
- ▶ Identify Asbestos Regulations (regulations were update Sept. 2014)
- ▶ Determine Suspect Asbestos Containing Materials and much more...

Lead Awareness: 37,500 Reasons to Understand the Lead RRP Rule

Session 2: 10:00 am—12:00 pm

The greatest exposure to lead from lead paint occurs as a result of swallowing or breathing in lead-based paint chips, dust and soil. Many houses and apartments built before 1978 contain lead-based paint. Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly.

- ▶ Safe Work Practice Requirements
- ▶ General Contractor/Subcontractor Relationship
- ▶ Firm Certification, Record-keeping and much more...

Health Hazards in Construction

Session 3: 1:00 pm—3:00 pm

This workshop will help educate and make the construction manager/worker aware of some of the typical occupational health hazards and potential health effects that are associated with the construction trade industry. The workshop is designed to give the student an overview of the basics in industrial hygiene, as well as health issues that may be encountered in the construction industry.

- ▶ Asbestos, Lead, Cadmium, Isocyanates, Chromium VI, and much more...

Learn from the Regulatory Experts!

EPA, Region 10
 Department of Commerce
 Spokane Regional Clean Air Agency
 DOSH On-Site Consultation Program
 NICA Consultants

Who Should Attend?

Commercial/Residential Contractors
 Demolition Contractors
 Maintenance Personnel
