Fennell Purifoy Names Colley Burrow and Christian Martin Partners

LITTLE ROCK, Ark., (Jan. 20, 2014) - Fennell Purifoy Architects recently announced the naming of two new partners to the firm's leadership. Colley Burrow AIA and Christian Martin AIA became the firm's latest partners on Jan. 1, 2014.

"We are excited that Burrow and Martin have become official partners of Fennell Purifoy," said Tom Fennell, Principal. "These two have worked with us for several years, and we look forward to continuing these relationships as they transition into their new roles as partners," Fennell said.

Originally from Wynne, Ark., Burrow is a University of Arkansas graduate. In 2007, Burrow attained his registered architectural license in the State of Arkansas, and joined Fennell Purifoy Architects in the fall of that year. Burrow's experiences as a project designer and coordinator, client/owner contact and specification writer will continue as he serves the firm in his new role as partner.

Martin is a native of North Little Rock and graduate of the University of Arkansas School of Architecture. He joined Fennell Purifoy in 2001. Throughout his time with the firm, Martin's role has evolved from design detailing, project management and specification writing to that of head of contract administration. Martin has worked on jobs ranging from small renovations to large-scale projects such as multi-family housing, college buildings, libraries, churches and stadiums.

"Burrow will be in charge of the project management phase for all of our work, including scheduling, cost estimating and personnel assignments," said Fennell Purifoy Principal Phil Purifoy. "Martin's role within the firm will continue to focus on the construction phase of the work, but will now include client and business development," Purifoy said.

Fennell Purifoy Architects is a full service professional architectural and planning firm established in Little Rock in 1985. The company works throughout Arkansas as well as in Dallas, Tulsa, New Orleans and other sites across the country. The firm's emphasis is on community-oriented projects, including schools, offices, libraries, athletic facilities, neighborhood planning and affordable housing.
