Basic EQUIPMENT OPERATOR Certificate

March 14–25, 2016, an opportunity
to begin a Construction Career.

Learn more about this exciting
new program at an Informational Session on
Thursday, February 18, 2016 at 7:00pm in Room C304.

The **74-HOUR EQUIPMENT OPERATOR CERTIFICATE** is intended to prepare individuals for entry-level work in the road construction industry. You will learn basic equipment terminology, operational techniques, and applications for forklift, skid steer, and mini excavator, using simulators and actual equipment. Basic operation includes prestart checks and inspection of structural hardware, powertrain, hydraulic and electrical systems and controls. Additional topics include career opportunities, sustainability practices, flagger training, load securement and containment. You will also learn job readiness skills including OSHA 10-hour for Construction, CPR & 1st Aid, and interpersonal skills to work as a team member.

GAP tuition assistance is available to qualifying students based on income guidelines.
