# Certified CRANE OPERATOR TRAINING

## March 14–April 1, 2016

### Credentials Earned:

- NCCCO Swing Crane Operator Certification
- Rigging & Signal Qualification

During this 3 week course participants will have a mixture of classroom and hands-on training to become a certified crane operator based upon the National Commission for the Certification of Crane Operators (NCCCO) standards. Participants will become qualified in Rigging/Signaling as well as take the written and practical exams for operator certification. Upon completing the course and passing all required exams students will have all necessary NCCCO certifications to begin a Crane Operator career. This training is intended for new operators with no previous crane experience.

### Topics to be covered include:

- Proper Crane Setup
- Safety
- Daily Inspection
- Types of Cranes
- Operations and Limitations
- Rigging Hardware/Slings/Hitches
- Voice and Hand Signals
- Load Charts

**Please contact Scott Abbott for more information
