

Common Nighthawks in New Hampshire

THURSDAY, OCTOBER 20th, 7:30 PM

The Loon Center

Lees Mill Rd. Moultonborough

Handicapped Accessible

Contact: The Loon Center at 476-LOON (476-5666)

The state-endangered Common Nighthawk has declined significantly in New Hampshire. NH Audubon Biologist Becky Suomala will talk about these fascinating birds, the effort to install gravel nest patches on roof tops, and the latest on their nesting in the state. She'll also share stories on the successes and failures of nighthawk nests – including the Ossipee pine barrens.
