About Duvinage

Founded in 1895, Duvinage is the leading manufacturer of custom metal stairs. Renowned for architectural beauty, superior engineering, and fabrication quality, Duvinage stairs are featured in buildings, homes, schools, and industrial facilities across the United States and Caribbean.

About Sharon Stairs

Founded in 1963, Sharon Stairs specializes in steel egress stairs designed, engineered, and manufactured to meet your stair and rail system needs. Sharon Stairs' Drop-In™ stair systems are specified in major projects nationwide.

Why Choose Us

-  We are the only American company capable of designing and fabricating every type of metal stair
-  We serve as a single point of contact for architects, general contractors, and miscellaneous metal subcontractors
-  We ship stairs in knockdown, sectional, or fully welded form for maximum flexibility and quick field installation
-  We build to the industry's highest specs in our dedicated stair production facility with premium materials
-  We achieve complex design solutions by applying 120+ years of expertise and dedication

CUSTOM METAL STAIRS

SPIRAL ▪ CIRCULAR
STRAIGHT ▪ MONUMENTAL
EGRESS ▪ ALTERNATING TREAD

SINCE 1895

CUSTOM SPIRAL

- Specified by architects nationwide
- Fully customizable to your specifications
- Ideal for conserving floor space in homes, lofts, condos, theaters, foyers, attics, decks, and as a secondary egress
- Meets IBC/IRC requirements and the highest industry fabrication standards
- Wood and metal tread options
- Traditional to contemporary styles
- Unlimited colors
- Knockdown, sectional, or fully welded versions

CIRCULAR

- Curved architectural stairs create a stunning focal point in commercial spaces and homes
- Wide range of tread, riser, stringer, and rail options to meet your specifications
- Single and double stringer designs

DROP-IN EGRESS

- Pre-engineered and pre-fabricated stairs provide 30-50% overall savings, compared to site-built, plan-and-spec stairs
- Fast, straightforward installation
- Federal, State, and Local building code-compliant and ADA options
- Shipments can be staged and stairs erected to provide early jobsite access
- Wide range of tread, riser, stringer, and rail options
- Proprietary tread options eliminate concrete work and minimize site cleanup
- Designed and fabricated in our dedicated stair production facility

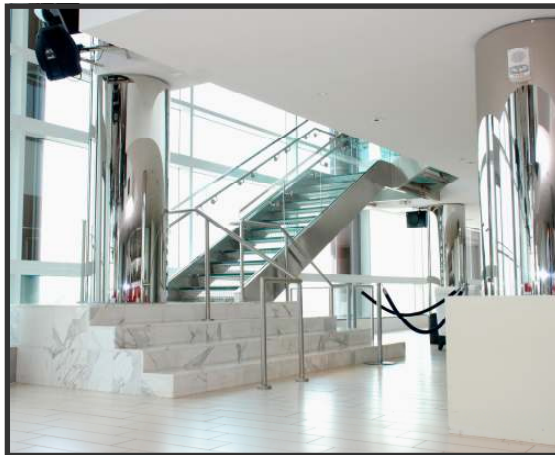

SPIRAL KITS

- Adjustable spiral stair kits for home and light commercial use
- Standard designs range from 3'-6" diameter to code-compliant 5'-0" diameter
- 7'-6" to 12'-0" heights
- Tread and rail options in wood and metal
- Aluminum spiral handrail included
- Balcony rail available
- Air dry paint, primer, and galvanized finishes
- Economical solution
- In stock for immediate shipment
- DIY installation

STRAIGHT MONUMENTAL

- Prominent, architecturally stunning stairs
- Fabricated to accommodate marble, granite, wood, glass, terrazzo, or concrete treads
- Wood, bronze, steel, stainless steel, aluminum, mesh, or glass railing
- Single and double stringer designs

ALTERNATING TREAD

- Unique design enables a shorter horizontal span than traditional stairs
- More versatile than ladders, allowing for a forward-facing descent
- 56°, 68°, and custom models
- Available in steel, stainless steel, and aluminum
- Unlimited colors
- Ideal for mezzanines, roofs, roof hatches, production lines, parapets, catwalks, storage tanks, loading docks, and emergency egress
