

2016 LANDSCAPE ARCHITECTURE INTERNSHIP

BNIM is seeking a talented landscape architecture intern in its downtown Kansas City office. The internship would last from January through August 2016.

Landscape Architecture is an integrated function of the design process at BNIM. Our unique collaboration process is core to our knowledge and learning-based organization. As a provider of landscape architecture and planning services, BNIM shapes environments that are healthy, efficient and responsive to clients' needs. Landscape Architecture overlaps with other design services. It brings with it a depth of expertise that maximizes the relationship between indoor and outdoor environments at every level of the site, scope and size of the project. Our strategic approach to landscape architecture aims to capitalize on the benefits of the resources we use while minimizing the environmental impact.

With 45 years of experience as a multidisciplinary architectural firm, BNIM has built a reputation for thoughtful, responsive and restorative design. The firm's areas of expertise include sustainable design and community redevelopment, educational facilities, campus master planning, corporate office spaces and urban design.

Internship candidates should be effective collaborators, passionate about sustainability, and committed to the highest level of design ideas and excellence. Good hand drawn graphic skills and proficiency in AutoCAD are essential. Experience in GIS, Adobe Suite and other presentation software are a plus but not required.

Contact: Please forward a resume, examples of your best work in digital form, and references to careers@bnim.com before noon on October 21st.
