

Where to Find ULTRA TEC PRODUCTS AND ITEMS OF INTEREST @ TUCSON 2012

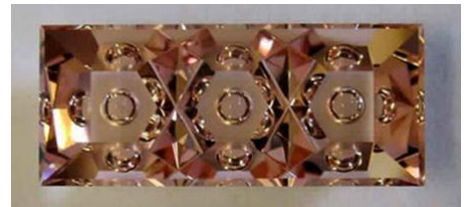

If you are going to the Tucson Gem Showssome things in particular to check out...

Dalan Hargrave will do a talk on Fantasy Cut Gemstones. It will cover the basic concepts of Fantasy cut gems including v-grooves, concave and flat facets – and various other techniques used in contemporary gem artistry. He will have equipment to show, including the new Ultra Tec V5 Mast which he confirms provides a type of stability important to controlled fantasy cutting. If you've heard Dalan before, or seen his videos, you know you will be both educated and entertained. Dalan will kick off the afternoon session, starting at 1PM and running to about 2:45PM

Dalan was the 2012 AGTA Award winner in the category of innovative Faceting. The stone, shown here, was a 30 ct Morganite – he named it “Hugs and Kisses”

When and where: The date is Feb. 3. It's a **US Faceters Guild (USFG) Seminar** to be held at the Old Pueblo Lapidary Club Building, 3118 North Dale Avenue – it's right near the intersection of North Alvernon Way and Fort Lowell Road.

The USFG offers this Seminar free of charge to both USFG member and non-members (think about joining USFG – an annual membership is only \$18).

For you early risers, starting at **8:30 AM** – **Lisa Elser** (www.lisaelser.com) will talk about heat treatment of some of the common gemstones we work with – and, you know that Lisa deals with practical information about the techniques and processes.

At **10:30**, **Wayne Emery** will talk about going from being a faceting hobbyist to being a professional – what would you need to look for and what would you need to change in making the transition.

Dalan Hargrave (www.gemstarz.com) will kick off the afternoon session with his Fantasy cutting talk starting at **1PM** and running to about 2:45PM.

The final session, at **3PM** will feature **Jim Rentfrow** (www.flawlessfacets.com) talking about his time in Afghanistan, where he conducted faceting, jewelry, and business training under the auspices of the USAID. He has just recently returned – with most interesting information – stories and pictures

See ULTRA TEC in Tucson...
