

Your Voice - Your Water

Water Matters and the Oldman Watershed Council are hosting

Round 2 of the 'Source to Tap' Community Conversations

Building on the first round of local meetings in Nov/Dec 2012, these final sessions aim to generate proactive solutions and build support for necessary stewardship actions to protect the health of the Oldman River headwaters ... for people and for the environment.

We will discuss:

- What specific stewardship practices or actions are currently happening in the headwaters? What else is required? What are the opportunities?
- How can watershed stewardship activities be further fostered and supported to increase their effectiveness over the long term?

You are invited to attend any of the community conversations. Participants in this second round need not have attended an earlier session. Your voice is important!

Wed, Feb 27: Springpoint Hall 5:30 supper followed at 6:30 by dialogue session

Thurs, Feb 28: Stavely Community Centre 5:30 supper followed at 6:30 by dialogue session
