

Fulton Asthma Improvement and Reduction (FAIR) Project

Improving the lives of Fulton County Residents through asthma education and management

Asthma is a disease of the lungs. Although there is no known cure, asthmatics can live healthy and full lives with the disease. FAIR wants to ensure that Fulton County residents do just that.

In-Home Assessments and Workshops

Triggers in the home may make asthma symptoms worse. Learn to Grow, Inc. offers in-home assessments and asthma education workshops to children and parents in Fulton County.

May is Asthma Awareness Month! Stay tuned for announcements from FAIR about outreach events and tips for staying well during the month.

FAIR Coalition

Community partners are standing with us to prevent asthma-related attacks, hospitalizations and deaths in our County.

The FAIR Coalition focuses on educating the community about indoor air quality, asthma triggers, and evidence-based asthma medical treatments.

To learn more about or become a member of our Coalition contact K. Danella Abdul-Barr (Kareema.D.Abdul-barr@riteaid.com) or Richard Johnson (rajohnsonctp@msn.com), Coalition Co-Chairs.
