*TX 15.1.**

Incident

- New NIBRS hate crime bias codes were added to meet the new TX DPS January 2015 specifications.
- Modified the printed incident report to contain the latest NIBRS location and property codes. Page 1 now contains the new location codes in the offense section and page 3 contains the newest property codes.
- The "Copy Incident" feature was added to the File menu. This feature allows for copying the currently open incident. Once the menu option "Copy Incident" is clicked the user is presented with a screen that allows for specifying what sections of the incident should be copied. Once the sections are chosen and the copy is made, the user is then presented with the option to immediately open the newly created incident record for editing.

Accident

- Many modifications were made to meet the new TX DOT January 2015 specifications. Changes include the addition of CMV fields for indicating the bus type and disabling damage. New codes were added to the license restriction and contributing factor lookups. The CR-3 and the accompanying code sheet were also modified to reflect these changes.

Officer's Activity Log

- The "Create Report" feature was added to the Event Details screen. This is accessed by clicking the "Create Report" button and from there the desired report can be selected. Accident, citation, incident, ordinance ticket, warning ticket or arrest reports can be created. The report created will contain the data entered from the event details that is pertinent and then can be edited further.
- The "Others Involved" page was added to the "Event Details" screen. This section is intended to hold additional persons involved beyond the primary victim, complainant, or accused. A person type field was also added to allow for indicating the type of person involved. An additional section was added to the Operations Report to enable printing these additional people when needed.

Evidence

- The Open Evidence screen now contains the ability to scan and navigate directly to an item on any evidence record. To use this feature choose to open an evidence record and then place the cursor in the supplied "Scanned Tag Number" box.

Scan a barcode and then the feature will perform a search and automatically navigate to the item scanned.
