Abuse is found among women and men regardless of social class, age, ethnicity and location. Economic control in an abusive relationship takes many forms and gaining financial self-sufficiency can be the difference between staying in or leaving a violent relationship. This workshop covers building a modest financial foundation and making plans for the future, which are crucial skills you can impart to individuals so they are empowered to make informed, responsible financial decisions to reestablish their lives. Our focused areas for this webinar is housing, and it will cover a variety of topics regarding the housing issues and concerns facing survivors of domestic abuse.
