

# THE AFFORDABLE CARE ACT

Health care information and resources for your small business

Historically, small businesses have had a tough time accessing affordable healthcare coverage that meets the needs of business owners and their employees. The Affordable Care Act (ACA) includes a variety of measures that benefit small employers and self-employed individuals.

Since 2014, businesses have had more choice over their health insurance through the Small Business Health Options Program (SHOP) Marketplace, and the Individual Marketplace. These new programs are designed to simplify the process of buying health insurance for your small business.

### ACA will help small businesses

Some small businesses that purchase coverage through SHOP may qualify for up to a

# 50% TAX Credit

### Individuals & Self-Employed

For more information, visit <http://business.usa.gov/healthcare>

All SBA programs and services are extended to the public on a nondiscriminatory basis.
