Your Computer Is Slow? Optimize It!

Classic Reasons for a Slow Computer:

- Too many applications run at the Start-Up program.
- Not enough system memory to run programs or games.
- Install and uninstall programs on your PC frequently.
- Lots of Windows and temporary files hide in system.

Typical Symptoms of Slow Computer:

- Wait for a long time to boost up the Windows
- Computer often locks up and becomes unresponsive;
- Takes long time to open browser and visit webpage.
- Obvious reduction of system performance
