

You can Make Money  
Trading the FOREX  
Markets **GOOD**  
**VIBRATIONS**

The **GOOD VIBRATIONS** technique explains why you cannot Day trade the same technique all the time and expect consistent results.  
You have to take the  
Forex market's **GOOD VIBRATIONS** into account.

When we start out in the Forex market we are told that Trillions get traded 24 hours, 7 days a week in this never sleeping market. After spending some time in the market you soon learn that the market has habits just like human beings. The market likes taking weekends and public holiday breaks. It has a daily routine where it sleeps, takes naps, is highly active and then relaxes.

Just like a human it's heart beats at a different pace depending whether it is sleeping, watching TV, being very active or doing routine activities. Your heart beat can go from 55 beats a minute to +160 beats a minute depending on the time of day and what activities you are undertaking. There are times when your heartbeat is very reliable (**GOOD VIBRATIONS**) and there are times when your heartbeat can be very unreliable (**BAD VIBRATIONS**). This technique is a study in finding the Forex market's **GOOD VIBRATIONS**.

I just wanted to say thanks to you guys for such a great webinar! I paid \$97.00 for the Good Vibrations System! I bought this course several months ago. Due to some serious health conditions, I was not able to open the files and begin to learn about the system until this week! Little did I know what I had awaiting me when I was finally able to open the files on this
