

Parents Can Change Their Baby's Destiny... FOR EVER!  
*How to Improve the IQ of Your Baby*  
From the Conception to the School

"You must know and take control over the environmental factors that determine the IQ and the emotional intelligence of your child. You can take action to improve it!"

**Are you a responsible parent that wants your child to be intelligent, healthy, happy and successful in life?**

If your answer is "yes" then this will be the most important website you will ever read. Let us show you how you can make all the differences for your baby, from conception to school.

The intelligence of a child is the result of several independent abilities, which are combined to contribute to his overall performance as an individual. It is estimated that about 60% of our intelligence is related to genetics, and the other 40% arises from environmental influences on the brain. So, you get 60% of your intelligence from your parents' genes and the other 40% from environmental influences in your formative years that may also contain the influences from your parents

The intelligence (IQ) of a child begins before birth, with the
