

MCS, Infor and IBM have Solution Savings for You.

With Infor A+ 10.00, you'll see measurable and rapid business process improvements, and you'll be able to make better decisions, faster, so you can stay competitive. Infor A+ users on version levels of 8.00 and under are on the older base package. The current base package has modules that you are lacking if you are on maintenance, but failed to upgrade. If you upgrade to the latest Release of Infor A+ 10.00, and purchase A+ GUI, Inventory Control Center and Workflow, you will receive the following modules for **FREE**.

A+ Modules Include:

- * Bill of Material
- * Electronic Data Interchange
- * Inventory Management and Planning
- * Advanced Inventory Management
- * Mail Server
- * Price Maintenance
- * Electronic Payment
- * Alert Pack
- * Fax

Deliver Value with Infor A+

With the current version of Infor A+ 10.00, you'll have a new way to run your business. You get a core distribution solution that integrates innovation and delivers increased efficiency and performance.

Built with IBM Power Systems

Infor A+ is built with IBM Power Systems™, which combine the power of IBM POWER8® and the security and reliability of IBM i® with affordable enterprise software tailored to help transform business processes, and make deployment and management simpler than ever. Infor A+ is not only the most reliable and comprehensive distribution solution, it's also the most innovative solution available to distributors committed to the IBM i platform.

See Results Now

Strengthen your performance and drive strategic expansion with Infor A+. It has helped companies, such as PetFood Experts, Puerto Rico Supplies Group, WAXIE Sanitary Supply, and The Claffin Company gain the visibility, speed, and flexibility to cope with change and to create new services for increased revenue.

There's EVEN MORE SAVINGS with IBM.

Infor and IBM has made it even better for you when you purchase a Solution Edition. Solution Editions are orderable packages of IBM i and Power Systems that can only be purchased in combination with core-business applications from Independent Software Vendors (ISVs).

IBM Power S814 and 720 Solution Edition (4 core - Entry Level P05 Tier) eligibility requirements:

The server must be ordered with a Solution Edition feature code.

The server must be a new purchase, not an MES upgrade.

The offering must include new and/or upgrade software licenses and/or software maintenance from the ISV for the qualifying IBM server. Services and/or training for the qualifying server can also be provided.

Proof of purchase (for example: a copy of the invoice) of the solution with a participating ISV must be provided to IBM on request. The proof must be dated within 90 days before or after the date of order of the qualifying server.

The combined value (software, maintenance, services and training) of the ISV purchase must be **US \$6,500 or greater.**

The IBM Power System S814 and 720 Solution Edition (6 or 8 core Growth Level P10 Tier) eligibility requirements

are the same except for the combined value (software, maintenance, services and training) of the ISV purchase must be **US \$25,000 or greater.**

About MCS

Maximum Computer Systems, Inc., a New York based leading systems integration provider, focuses on developing effective business software solutions for the wholesale distribution industry.
