Their challenge: Describe experiments, summarize results, highlight important findings, and be ready to answer questions by leading poultry scientists from around the world.

It's no easy task, yet five graduate students involved in research on poultry health with Diamond V products rose to the occasion at the International Poultry Scientific Forum (IPSF), January 26-27 at the Georgia World Congress Center in Atlanta preceding the International Poultry and Processing Expo (IPPE).

Altogether, nine presentations involved Diamond V products – Original XPCTM and our new AviCareTM for use in poultry drinking water. Presentations included research on the poultry immune system and pre-harvest food safety. Find abstracts of studies at <http://www.diamondv.com/species/poultry-nutrition-and-health/>.

Five of the graduate students involved in research presented in Atlanta received IPSF \$500 Travel Awards from Diamond V, presented later at our IPPE booth (photos below).

Young researchers receive travel awards

Professor John Carey (Texas A&M University) with Travel Award certificates for **Wen-Ko Chou** and **Jungwoo Park**:

- "Immunomodulatory effects of Diamond V Original XPC supplementation on immune gene expression in broilers" (2015 IPSF Abstract M28) — Chou, W.K., J.W. Park, J.B. Carey, D.R. McIntyre, and L.R. Berghman
- "Effects of Diamond V Original XPC on modulating adaptive immune function in broilers" (2015 IPSF Abstract M29) — Park, J.W., W.K. Chou, L.R. Berghman, D.R. McIntyre, and J.B. Carey

Stephanie Roto (University of Arkansas): "Cecal *Salmonella* and indigenous microflora response to Original XPC-fed broilers" (2015 IPSF) — Roto, S., S.I. Lee, P. Rubinelli, S.H. Park, and S. Ricke

Cassandra Breedlove (Auburn University): "Effects of fermentation product of *S. cerevisiae* XPC in chicken diets on resistance against infectious bronchitis virus" (2015 IPSF Abstract M7) — Breedlove, C., A. Ghetas, S. Gulley, F. van Ginkel, K. Joiner, V. van Santen, and H. Toro

Brooke Bartz (North Carolina State University): "Effect of AviCare in water and Original XPC in feed on turkey hen performance affected by management" (2015 IPSF Poster)

For more information about presentations of university and other controlled research at IPSF 2015, please contact one of our [Poultry Advisors](#).
