

PDA Europe Polyurea Applicator Spray Course ***· 30th March – 2nd April 2015, Alfreton ·***

Time: 9:00h Monday 30th March to 17:30h Thursday 2nd April 2015

Location: The course will be held at the BASF facilities in Derby.

**Wimsey Way,
Somercotes, Alfreton
Derby, DE55 4NL
England**

Language: This training will be given in English

This course identifies the many elements involved in the successful set up and operation of polyurea spray equipment. It also gives attendees an in-depth analysis of commercially available equipment designs and necessary hardware components to ensure successful operation and spray application of polyureas.

The course duration is four full days, runs from 9:00 a.m. to 5:30 p.m. and includes lunches every afternoon and one diner.

We limit the class to 20 people so everyone may operate the equipment and participate in the open discussions. You learn from the instructors and from each other.

***VERY IMPORTANT** – Attendees are responsible for bringing a 1/2-face organic cartridge respirator, classified ABEK and safety shoes. During the practical spraying sessions, safety glasses, gloves and overalls will be provided.

Prices:

PDA Europe members: 1.400 EUR

Non-members: 1.700 EUR

Registration:

Registration is open on http://www.pda-europe.org/event_2011applicator.asp. Payment is done online during the registration process by credit card or by bank transfer. Registration will be done on a first come, first served basis due to the limited number of seats available.

Hotel reservation:

Santo's Higham Farm Hotel is recommended to participants.

Price per night / person :

68 GBP, including breakfast.

Please inform the secretariat if you need a hotel room and we will book it for you. You will be asked to settle your room upon check-out.

The hotel is located 10 minutes away from the BASF facilities and transportation will be arranged every day.

Impressions from previous PDA Europe Spray Courses...

***"Polyurea, the
next generation"***

"The applicator spray course has greatly helped in the delivery of PDA Europe's message of quality in application of polyurea".

"Confident it will help alleviate any potential problems BEFORE they happen"
