

## The 13<sup>th</sup> Biennial Meeting of the Australian Microanalysis Society

The 13<sup>th</sup> biennial meeting of the Australian Microanalysis Society was held in Hobart Tasmania from the 11<sup>th</sup> to the 13<sup>th</sup> of February. Our sister societies of microscopy and microanalysis were well represented. The enclosed photo shows from left to right: Tom Kelly, President of the Microanalysis Society; John Mansfield, President of the Microscopy Society of America; Mike Matthews, President of the European Microbeam Analysis Society; Ric Wuhrer, President of the Australian Microbeam Analysis Society; Martin Saunders, President of The Australian Microscopy and Microanalysis Society; and Ed Vicenzi, President of the International Union of Microbeam Analysis Societies.

The meeting encompassed presentations in a wide range of topics in microscopy and microanalysis, including scanning electron microscopy, transmission electron microscopy, electron probe microanalysis and a burgeoning imaging technique: laser-ablation inductively coupled plasma mass spectrometry.
