

I recently received notification for a Children's Choice Waiver slot offer for my daughter. I was very excited! I've been advocating for additional waiver slots for years and waiting a long time to receive one.

I saw Families Helping Families of Jefferson was providing a workshop on, "How to Choose a Service Provider?" Since this is such an important decision, I registered for the event.

I couldn't have been more pleased with the thorough presentation and the information I received. I feel I left this training with the tools I needed to make an educated and informed decision. In addition to learning how to choose a service provider, I learned about the role of the service provider, how to choose a direct support worker, and the role of support coordination.

Thank you Families Helping Families of Jefferson for providing such informative trainings in the community.
