

# CELL PHONE INVESTIGATIONS TRAINING

Thursday & Friday, July 9<sup>th</sup> & 10<sup>th</sup>, 2015

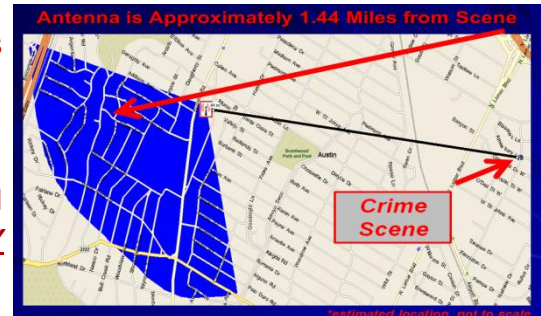

9 AM – 5 PM

Stafford, Virginia

**Training includes the following and more:**

- what data is available from cell phone companies, including records of phone calls, geographic data, text messages, multimedia messages, voicemails, and Internet data such as emails, web traffic, and IP data?,
- what data is available on the physical cell phone devices themselves and important considerations for all first responders?,
- introduction to how law enforcement typically uses the data,
- introduction on how to interpret, analyze, map, surveil, archive, and present this extremely valuable data that exists in essentially **EVERY** criminal investigation conducted,
- what real-time surveillances may be conducted on cellular telephones, including traps and traces, pen registers, geolocations, and intercepts known as “wiretaps?”,
- Detailed introduction to the geographic data that is available from cell phones, and, how to map this data with inexpensive tools along with important considerations regarding the courtroom presentations of cell phone data?, and,
- introduction to important legal considerations regarding accessing and utilizing cell phone data, and, where the field is headed and how will it impact law enforcement.
