

## **Neighborhood Focus: Sumner**

Residents are continuously working to provide access, cleanup and environmental stewardship at Johnson Lake. The lake is one of the only natural areas in Sumner. Other projects include a community garden at Helensview, an alternative High School, and keeping air pollutants from light industrial uses regulated. This kind of community care is only possible with strong determination from the people who live there. Sumner families of all ages and backgrounds also love a neighborhood gathering and never fail to turn up in high numbers for the annual BBQ and Kids' Halloween party. We know the saying it takes a small group of dedicated people for change to happen and it continues to be true in Sumner.
