Answer...

You might be thinking sports; however the teacher with the highest number of wins is in academics. Our science teacher, Mrs. Gaughan, has prepared students for competition at our area science fairs for 20 years. Perhaps you or someone you know has earned one of these awards. In fact, Mrs. Gaughan has had science fair winners each and every year.

This winning record is no accident. According to Mrs. Gaughan, students became even more engaged in science when the Silver Academy received the "Lab Learner Hands on Science Program", which changed the curriculum. Students experiment and work like real scientists, which is very engaging. They even get to wear lab coats!

On a personal note, Susan, her husband Jim, and two daughters live in Hummelstown. The entire family is often on the go, as their daughters, Logan and Madison, are active in school and with field hockey.

Speaking of on the go, Mrs. Gaughan and the 8th grade students will be at the Whitaker Center this week for the Capital Area Science and Engineering Fair. Good luck to everyone!
