# Introduction

The Federal Nutrition Programs are government funded food programs designed to improve the nutrition, well-being, and food security of low-income Americans. The programs are administered through the various divisions of the United States Department of Health and Human Services (HHS) and Food and Nutrition Services (FNS) of the United States Department of Agriculture (USDA) on a national level and various agencies on the state and local level. The Federal Nutrition Programs included in this document, including the administering agency are depicted in the following charts. The nutrition programs are highlighted in red.

Each nutrition program has a role toward helping states achieving the Centers of Disease Control (CDC) Division of Nutrition Physical Activity and Obesity (DNPAO) recommended strategies for the state public health actions to prevent and control obesity. The intent of this document is to provide information on the role of the different programs toward achieving the strategy and to encourage collaboration at the state level by describing and providing examples of program activities.

The following table provides links to the governing documents for each nutrition program. For this table and all subsequent tables programs are as follows:

- Senior Meals = Congregate Nutrition Services + Home Delivered Nutrition Services
- 1305 = Cooperative Agreement DP-13-1305
- School Meals = School Breakfast Program + National School Lunch Program
