

Program Dates:

June 1st to August 14th, 2015

Compensation:

- \$2750-\$4,000 stipend
- AmeriCorps Education Award for some positions
- Wilderness First Aid certification

Who Should Apply:

- Career-driven undergraduates, recent graduates, and graduate students.
- A desire to learn about the management and many uses of public lands
- Applicants must have their own reliable vehicle.
- Some internships will require backcountry skills and travel

Spend this summer living in the beautiful Four Corners!

Gain hands-on experience contributing to real-world natural and cultural resource projects. Interns work with and learn from natural and cultural resource managers, administrators, planners, or researchers to address topics such as ecosystem health, federal lands management, and visitor experience. Internships are based out of various locations in southwest Colorado.

FOUR CORNERS FEDERAL LANDS INTERNSHIP PROGRAM

The Four Corners Federal Lands Internship Program (FC-FLIP) is a partnership of:

- Mountain Studies Institute
- Conservation Legacy
- San Juan national Forest
- Bureau of Land Management
- National Park Service
- Fort Lewis College
- San Juan College

**Application Deadlines:**

Varies Depending on Position March 8th—15th

2015 FOUR CORNERS FEDERAL LANDS INTERNSHIP PROGRAM (FC-FLIP) POSITIONS

San Juan National Forest, Pagosa District - Forest Vegetation Intern

As a Forest Vegetation Intern, you will participate in wide variety of forestry tasks. Primarily these tasks focus on assisting with forestry technicians with the establishment of Common Stand Examination plots and assisting with data entry into a common database.

Springs and Seeps Inventory and Database Intern

Partner with the Mountain Studies Institute and the Springs Stewardship Institute (SSI), of the Museum of Northern Arizona to map springs and springs-dependent species, and to improve understanding of climate change risks to springs in the Colorado River Basin within the Southern Rockies Landscape Conservation Cooperative (SRLCC) region.

San Juan National Forest, Columbine District - District Ranger Intern

The District Ranger Intern will primarily work on range management issues and monitoring. This internship will experience the many facets and complexities of the daily management of a USFS national forest Ranger District.

San Juan National Forest, Dolores District - Visitor Information Intern

The Visitor Information Intern will assist with public interaction by working the front desk of the Dolores Public Lands Office. The intern will also participate in the developed recreation program by assisting with the general maintenance and upkeep of developed recreation sites.

BLM Tres Rios Field Office - Administration Intern

This internship is a unique opportunity to experience the management and analysis of a multi-million dollar budget. The intern will use database management tools to facilitate the creation and analysis of the budget, as well as, assist the Southwest District Budget Analyst with the development of easy to use online budget tools for BLM staff.

BLM Tres Rios Field Office - Fluid and Solid Minerals Field Assistant

The intern will work with the Fluid Minerals (oil & gas) and Solid Minerals (gravel, rock quarries, etc) staff at the Bureau of Land Management's Tres Rios Field Office to assist with daily operations. Duties will include assisting with the permitting process, site inspections, working with paleontology surveys, and general report and data compilation.

BLM Tres Rios Field Office - Visitor Information and Recreation Intern

The intern will work with visitors at the Dolores public lands office and Anasazi heritage center to provide information in-person and over the phone. In addition the intern would have the opportunity to work with local recreation managers to support recreation facility maintenance, visitor contacts, and trail work.

San Juan National Forest - Field Hydrology Intern

This internship offers a tremendous opportunity to do field work in a wide variety of beautiful terrain and locations across the San Juan Public Lands. The intern will learn about hydrologic survey techniques, water quality sampling, small-scale restoration work, agency-approved hydrologic monitoring techniques and basic Colorado water rights law.

Two to three more internship TBA.
