**Coverline: 97.57**

**Method:** Advanced

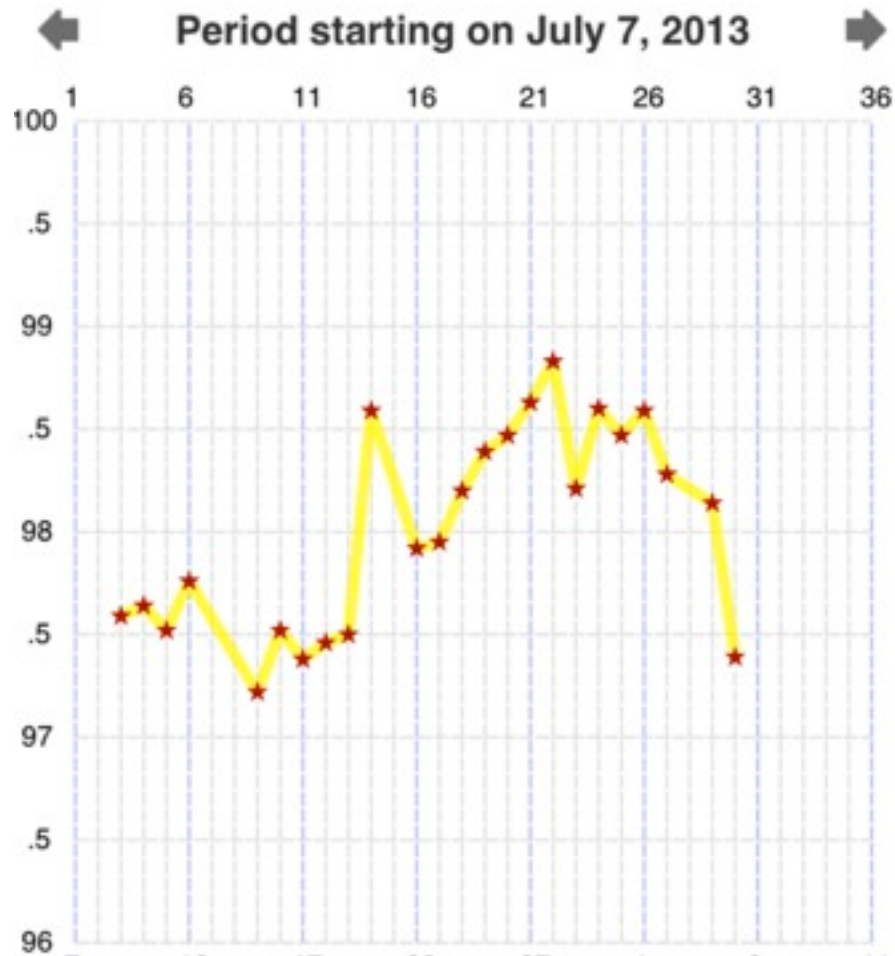

Chart 2 - June

## Case 2

J.K.K. Age 29

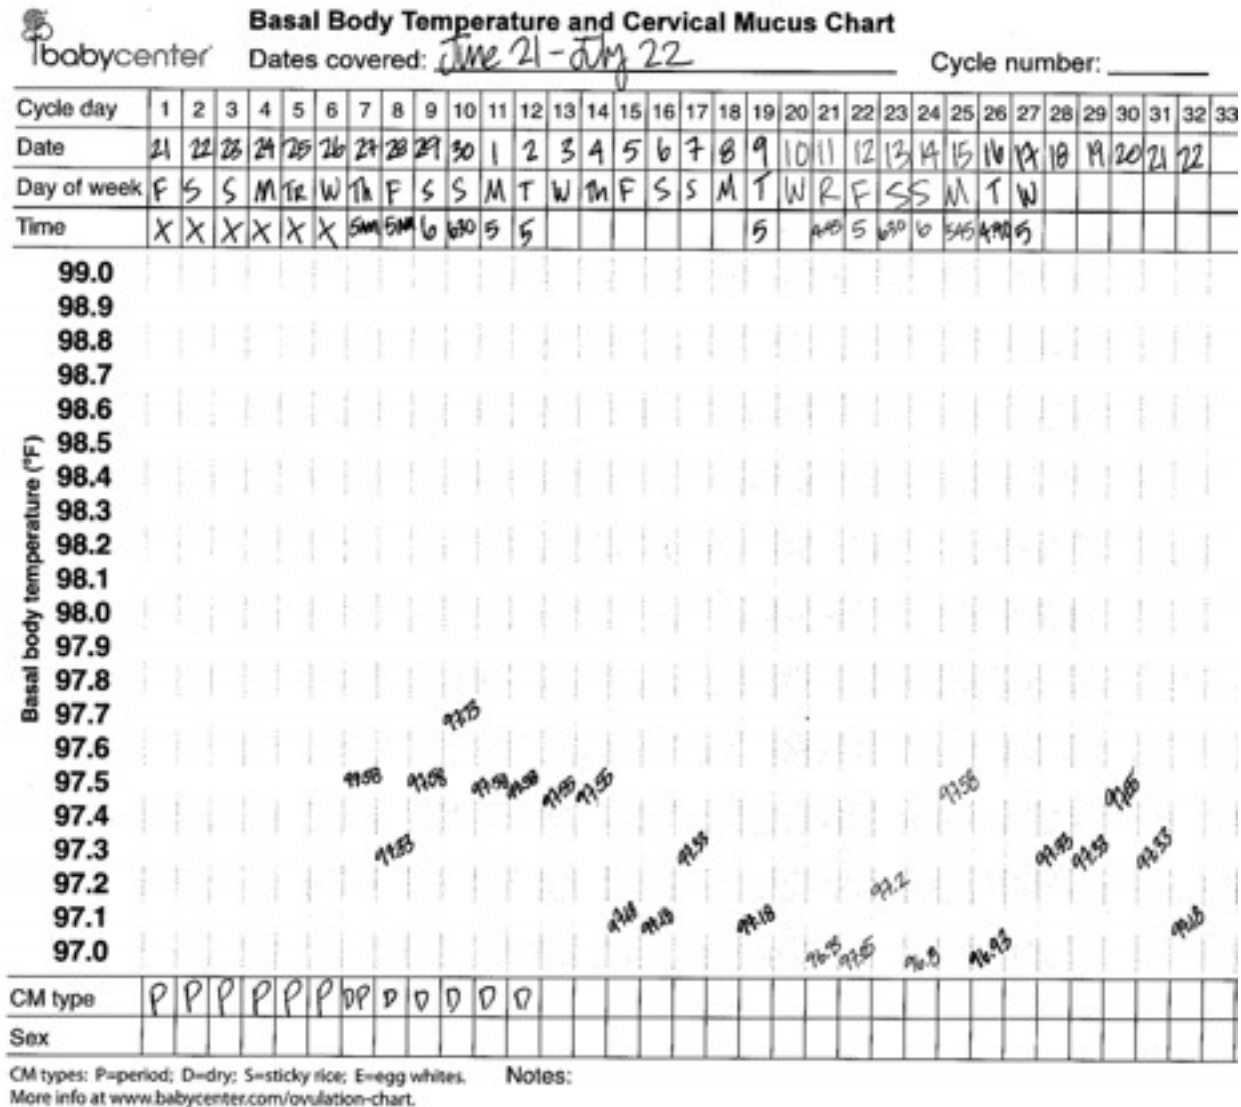

short (but pretty regular) cycle and painful periods, and a few days of spotting before my period, so my suspicion is endometriosis

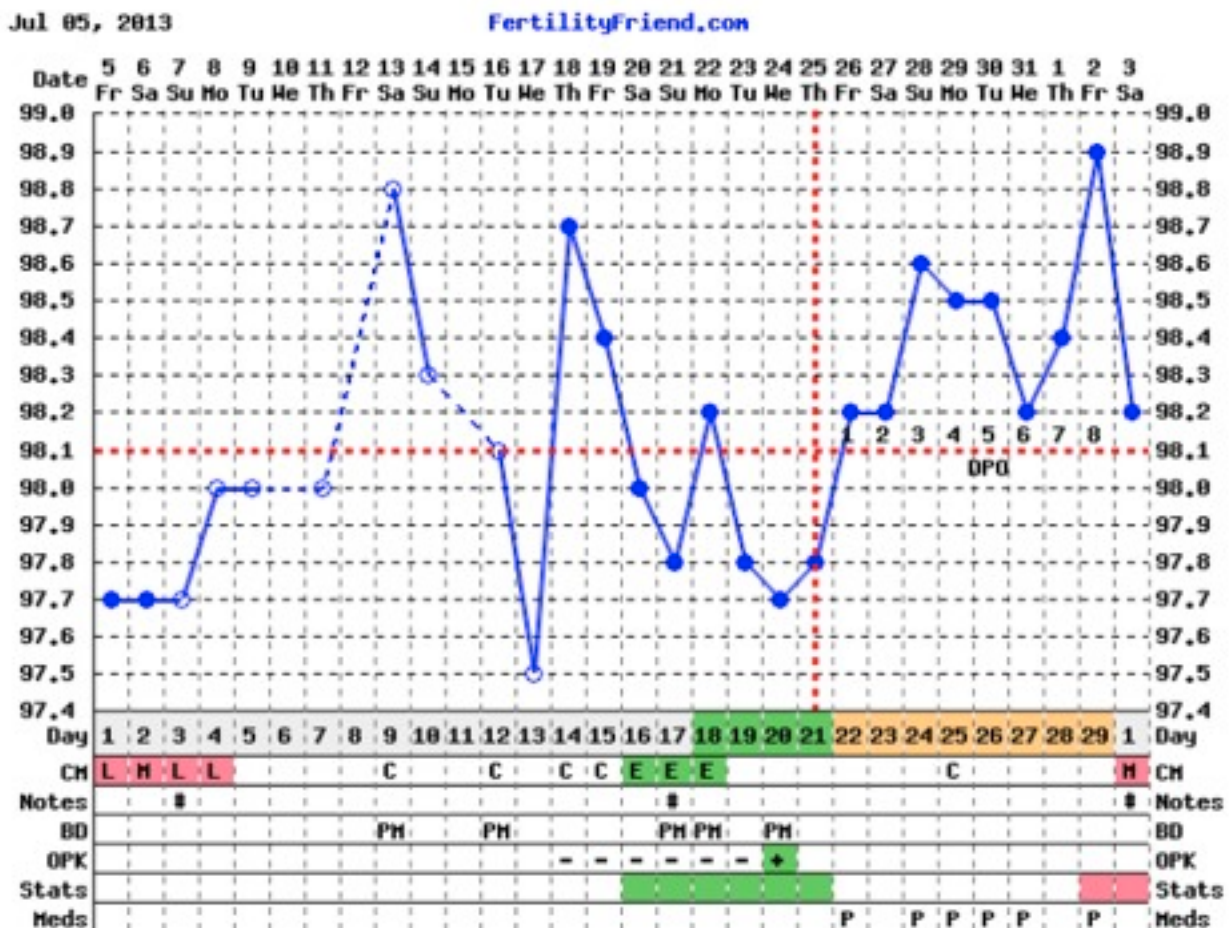

## Case 3

L.H. Age 29

Diag w PCOS 2 years ago

## Case 5

L.S. Age 36

- husband had reversal vasectomy almost a year ago, also had single orchiectomy, have had 3 children previously together. Wondering if she is pregnant.

Cycle started June 23 w/o data. Day 21 thermal shift detected.

According to this you menstruated on July 21. Is that correct?
