BEMER-NYC Services

What is the BEMER?

BEMER *physical vascular therapy* is a non-invasive medical device that improves restricted circulation in the smallest blood vessels and thus supports the body's own self-healing and regeneration processes, as well as energizing you. Use it at home or in your doctor's office.

For details on what it looks like, how it works, and where to try it, visit: www.BemerAmerica.com/NYCI.
