

# Host your Website from Home

How to set up a web server and get your own domain name

**Learn how to host your website  
from your own computer in under one hour...  
Whether you are a geek or not!**

**Let me guess:**

- You've been searching for tutorials on how to host your website from home, and if you're a little more knowledgeable about the subject, you've been specifically looking for info on how to set up a web server and domain name.
- You may have been in a bunch of discussion boards, asking around about this information.
- Some people tried to discourage you by telling you that hosting your site yourself is not worth it. Some gave you some useful information, but you are still missing a whole bunch.
