The Ultimate Guide to Creating a Website With WordPress

You are about to gain a tremendous advantage over most WordPress users when it comes to creating a website.

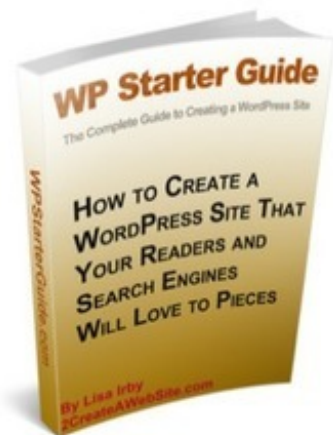

WordPress was originally designed for news-oriented sites, but because of its ease of use and flexibility, people are now using it to create all kinds of websites.

The problem is, most WordPress sites aren't really "news sites", but the average user doesn't know how to effectively use the WordPress Menu function and static pages to create a website with a logical navigation and optimal content layout.

FACT: Not every WordPress site should be organized in a **total blog format with only categories and posts**. WordPress is not just for blogs.

FACT: Too many users fail to make effective use of static landing pages, causing their important content and visitors to **get lost in a sea of dated posts**.

FACT: Traditional static website owners use them because they assume their content can
