Looking for a Green Source for Alternative Energy?....

How would you like a backup or full time source of cheap electricity in your backyard? A source that is sustainable and green... biodiesel. A complete system that puts out huge amounts of power compared to much more expensive solar and wind systems. And it only runs for 1-2 hours a day but provides your home with electricity 24 hours a day, 7 days a week, rain or shine and no wind needed!

Make sure you read about the **FREE BONUSES** (methane, free energy notes, and solar energy usage without solar panels) at the end of this letter. Read on...

Updated: **November 14, 2014**

From: Bill Anderson
Network 6000, Inc.

Dear Friend:

Did you ever wonder what would happen if your electricity went off for weeks at a time, or maybe even permanently? Did you ever wonder what you would do if gasoline went to \$5.00 per gallon or we ran out of gasoline completely? Unfortunately, the possibility of these things happening are becoming more and more likely. Needless to say, both of these situations will create very serious hardships in your life... no TV, no air conditioning, no electronics at all, no traveling, no groceries, no stoves, ovens, or microwaves, etc. As you think about how your life would change, let me tell you about a book that contains the solution to both problems - making electricity and making your own biodiesel fuel from used cooking oil or homegrown vegetable oil (along with several other *alternative energy* solutions like methane and passive solar). God forbid, if it does happen, how happy will you be that you prepared yourself ahead of time? Ever try to buy a generator just before or after a hurricane? It's almost impossible! Right now, read all about this incredible book that will make a huge difference in your life...
