

Are You Slowly **KILLING** Your Anthurium?

From: Leslie Shigeka

Dear Friend,

You might be slowly killing your [anthurium](#) and not even know it.

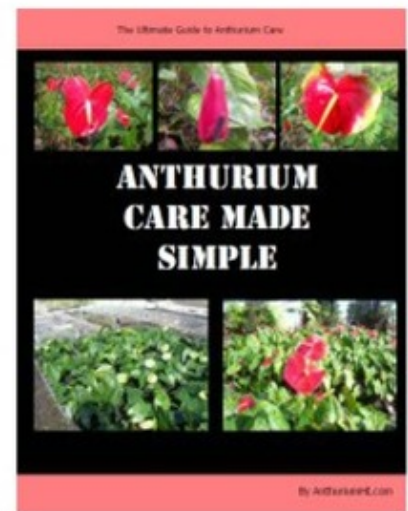

Has your anthurium stopped blooming or has its leaves started to turn yellow?

These are early warning signs that your anthurium may not be getting the care that it needs.

Now I know that you love your anthurium plant and would never do anything to harm it.

But are you doing everything in your power to keep it healthy?

Are your watering practices leading to deadly root rot? Or do you know what to do to prevent the devastating anthurium blight, which can kill up to 95% of the anthurium plants that it infects?
