RE: How To Build A Flagstone Patio & Walkway

Dear Homeowner,

If you're planning on laying a flagstone patio or walkway then it's very important you know exactly what you're doing. There are many important steps you need to know before attempting to build a natural flagstone patio. Not knowing these steps can quickly turn a small flagstone project into a long and expensive flagstone project.

Here's the problem many homeowner face right now...

Homeowners will often do some searching online for "How to lay flagstone" and find numerous DIY sites which in most cases have a short step by step flagstone patio installation guide to follow. I've spent a hours reading and researching these short instructional how to guides and quite frankly they make me laugh.

The Main Problem: They don't cover 75% of the steps and techniques you need to know when building a flagstone patio or walkway.

But it's worse than you think! Here's why...

Not knowing how to install a flagstone patio correctly can become very expensive and result in having a poor and embarrassing looking flagstone patio, plus you'll probably never use the patio because all pieces of flagstone will be uneven and move/rock when walked on. Patio furniture will sit on 2 or 3 legs instead of 4.

Take a look at the flagstone installed in the picture on the right to see how it's done. [Click Link Below](#) to lay flagstone correctly.
