Motor Vehicle No-Fault Law in Michigan

2011 Edition includes 2015 Supplement

George T. Sinas

Authored by:

Wayne J. Miller

The 2011 edition of this impressive textbook is now available. It is the definitive textbook regarding the Michigan No-Fault Law. Written by two of Michigan’s leading authorities on the No-Fault Law, this text is a “must have” resource for attorneys, judges, insurance claims representatives and anyone else needing insightful, in-depth information about this complex area of statutory law. It is also the course textbook currently being used at three of Michigan’s law schools.

The text contains a wealth of citations to numerous published and unpublished appellate cases, a multitude of new Supreme Court decisions and unpublished case law in a wide variety of areas under the law, including post-Kreiner decisions on auto negligence, troubling areas of priority and coverage analysis, along with a comprehensive academic and practical analysis of the substantive law. The 2011 edition also adds an entirely new appendix on contract formation and termination.

“George Sinas and Wayne Miller have collaborated on a remarkably concise overview of a sadistically complex area of the law. I have adopted their treatise as the primary textbook for my students at Cooley Law School. Law students and practitioners alike will find this to be a reliable, readable resource on auto no-fault in Michigan.” --James L. Borin, Garan Lucow Miller, P.C.
