

## Learning Technologies (self-access)

### Who it's for:

The course is for teachers who are relatively inexperienced in using technologies in the language classroom.

### Details:

An introduction to the main aspects of using new technologies in the language classroom. It takes into account different situations in which teachers find themselves: both where technology is only available outside the classroom, and where the classroom is well-resourced with IT.

The course modules cover a range of web technologies, with topics including using the internet, cyber well-being for learners, using Office applications, using online video and audio, and using social networking and other web technologies for educational purposes.

### Duration:

Self-access - 75 hours over 25 weeks

**Part of:** Any stage of the CPD framework

**Level of English required:** B1+

### Further Information:

Each online unit (30 in total) lasts around 2.5 hours, and includes links and video demonstrations about the technologies involved. It includes a wide range of practical ideas and web resources that teachers can directly use with their learners. The course is taken in 4 parts:

- Module 1 – Issues in learning tech
- Module 2 – Tech tools
- Module 3 – Tech techniques
- Module 4 – Language development with tech

### Certificate

Participants successfully completing the course will receive a certificate.
