

THE NATURE OF ICELAND

Come hear **David Govatski** talk about the flora, fauna, geology, & culture of the fascinating and beautiful Iceland.

Known as the Land of Fire & Ice, Iceland is a paradise for geologists and nature lovers. Home to 10 million Atlantic puffins and millions of other seabirds & waterfowl, it is considered to be Europe's 'Duck Factory'.

Govatski served as a Naturalist on the French expedition ship L'Austral in July 2014, and explored the country from Surtsey in the south to Lake Myvatn and Grimsey Island on the Arctic Circle.

Thursday Feb 19th @ 7pm
