

Lakes Region Audubon presents:

Climate Reality in Times of Change: Problems, Solutions, Action

Dr. Cynthia Melendy is working with the Climate Reality Team led by Vice President Al Gore, to help people understand the complex problems humankind has introduced to the planet's ecology. Technology & pollution has wreaked havoc on the balance of systems on Earth. Taking a step-by-step approach, Dr. Melendy will demonstrate the inter-relationships between technology, economy, and climate change, suggesting certain models that people can take with them into their municipal systems, businesses, and every day life.

Time is of the essence as we take action now and in preparation for the Paris Climate Talks in December 2015.

Thursday, March 19, 7:00 p.m.

The Loon Center

183 Lees Mill Road, Moultonborough, NH
